

## Are They Sanitary?

Perfect Pads are sanitary, antimicrobial and healthy for you!

Every Perfect Pad is made with a Hemp core.

### Superior Properties

Hemp fiber is one of the strongest and most durable of all natural textile fibers. Products made from hemp will outlast their competition by many years. Not only is hemp strong, but it also holds its shape, stretching less than any other natural fiber. This prevents hemp garments from stretching out or becoming distorted with use. Hemp may be known for its durability, but its comfort and style are second to none. The more hemp is used, the softer it gets. Hemp doesn't wear out, it wears in. Hemp is also naturally resistant to mold and ultraviolet light.

Due to the porous nature of the fiber, hemp is more water absorbent than any fabric including cotton.

### Environmental Advantages

Hemp is an extremely fast growing crop, producing more fiber yield per acre than any other source. Hemp can produce 250% more fiber than cotton and 600% more fiber than flax using the same amount of land. Moreover, hemp does not exhaust the soil. Hemp plants shed their leaves all through the growing season; adding rich organic matter to the topsoil and helping it retain moisture. Farmers have reported excellent hemp growth on land that had been cultivated steadily for nearly 100 years.

### Easy Wash & Care

Hemp articles of all kinds can take any amount of washing and keep coming up for more. They thrive on regular use and regular laundering.

Considered "Bulletproof" by many experts hemp is an amazingly strong, long-lasting fabric that launders easily. It handles extreme water temperatures well, and can be considered as machine washable linen. Over time it produces significant cost savings for owners because it has a much longer lifespan than all other natural fabrics. Because of the highly porous nature of the hemp fiber (i.e., magnified under a microscope it's filled with lots of holes) hemp dries extremely quickly naturally (in the open air) or is easily tumble-dried.

### What about odor?

Since Perfect Pads don't have plastic or adhesive they breathe, keeping the pad and you cooler and drier. The antibacterial / porous nature of Hemp keeps it cool under warm conditions. Bacteria (which causes odor) doesn't have a chance since it thrives in wet environments – like plasticky disposable pads! Hence the emergence of deodorants in the throw-aways. You will not have any odor problem with Perfect Pads.

Hemp is also naturally resistant to mold, mildew, ultraviolet light and odors. It's the porous nature of the fiber that makes it more absorbent than any other fabric including cotton. Hemp holds three times it's own weight!

Hemp is the obvious choice for Perfect Pads.
